Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

42. Internal Microservice Catalog & Health Portal

Name: Shreya C Rao

SRN: PES2UG24CS481

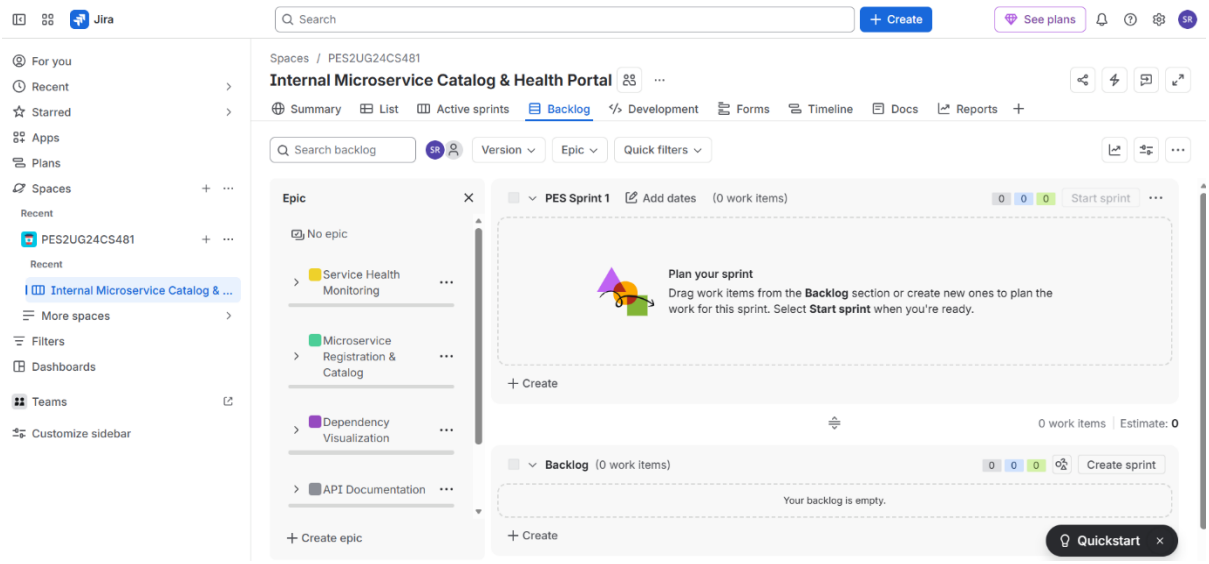

Sem: 5

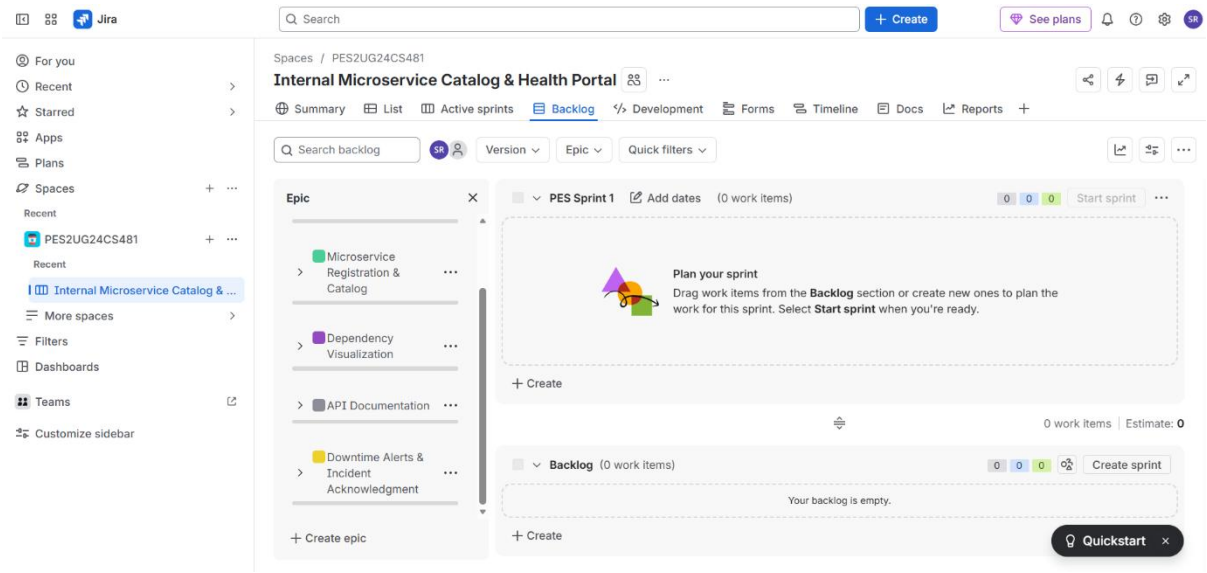

Sec: H

Deliverables :

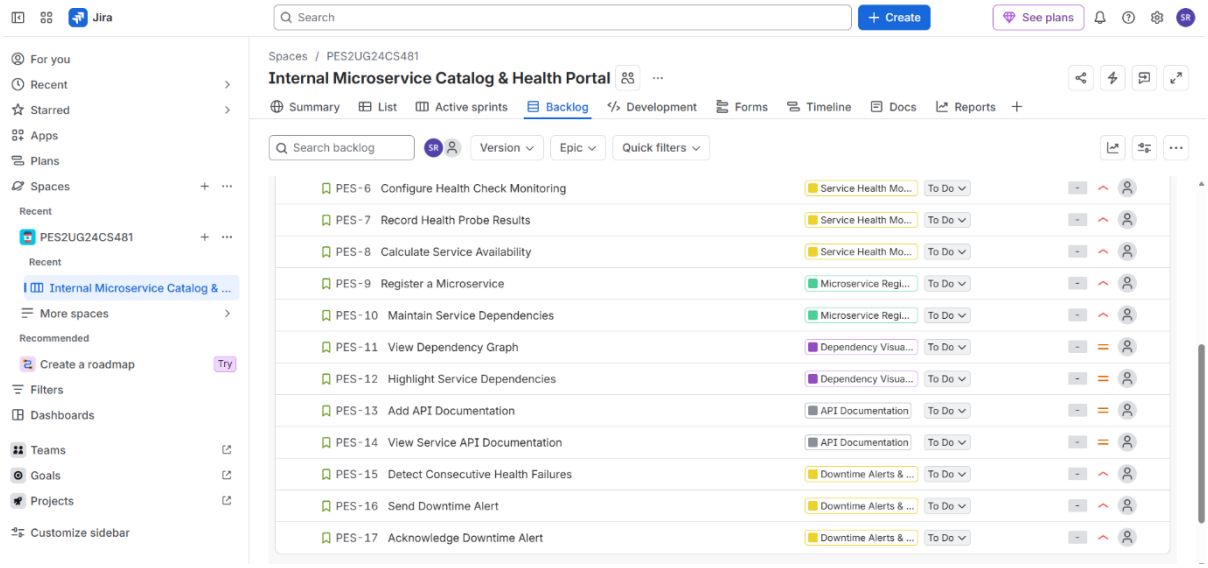

1. Screenshots:

Created five Epics from the functional requirements.

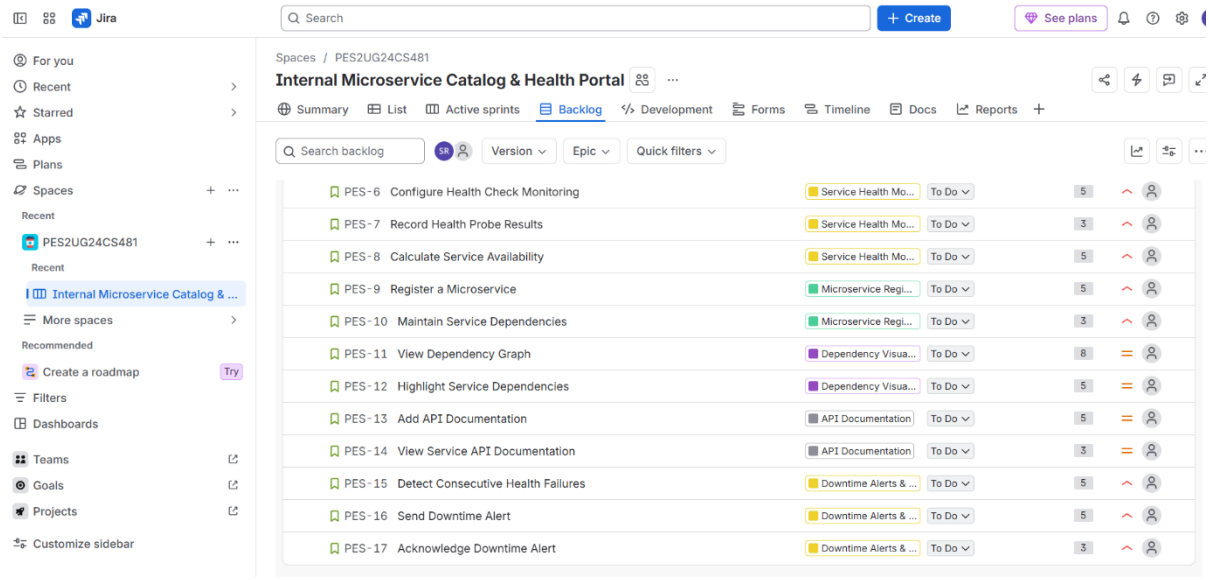

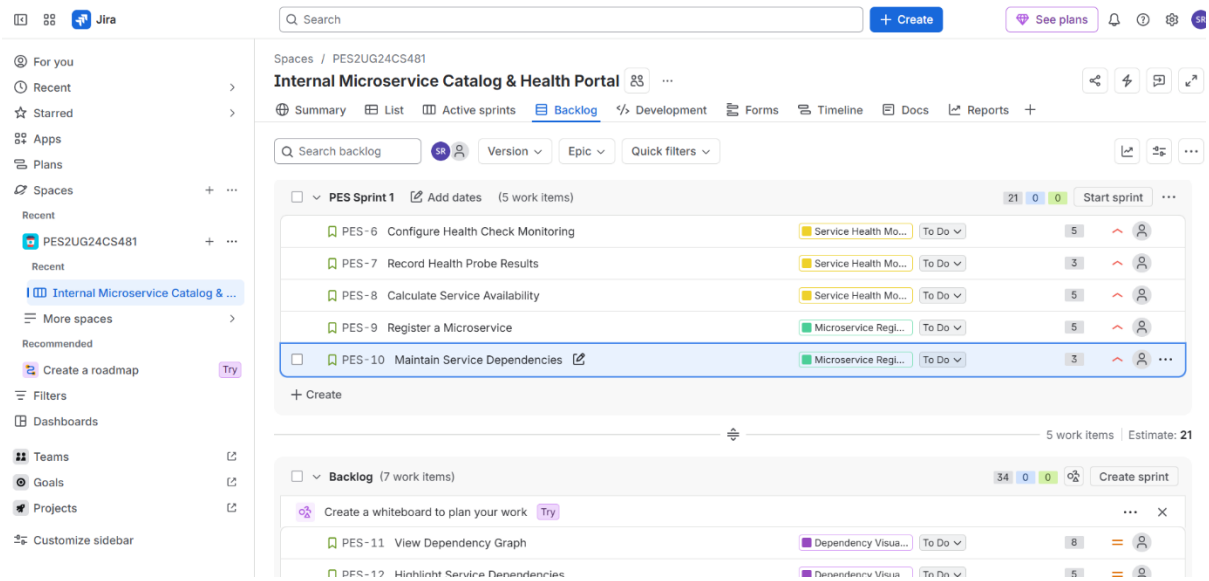

Added user stories under each Epic with priorities based on their importance.

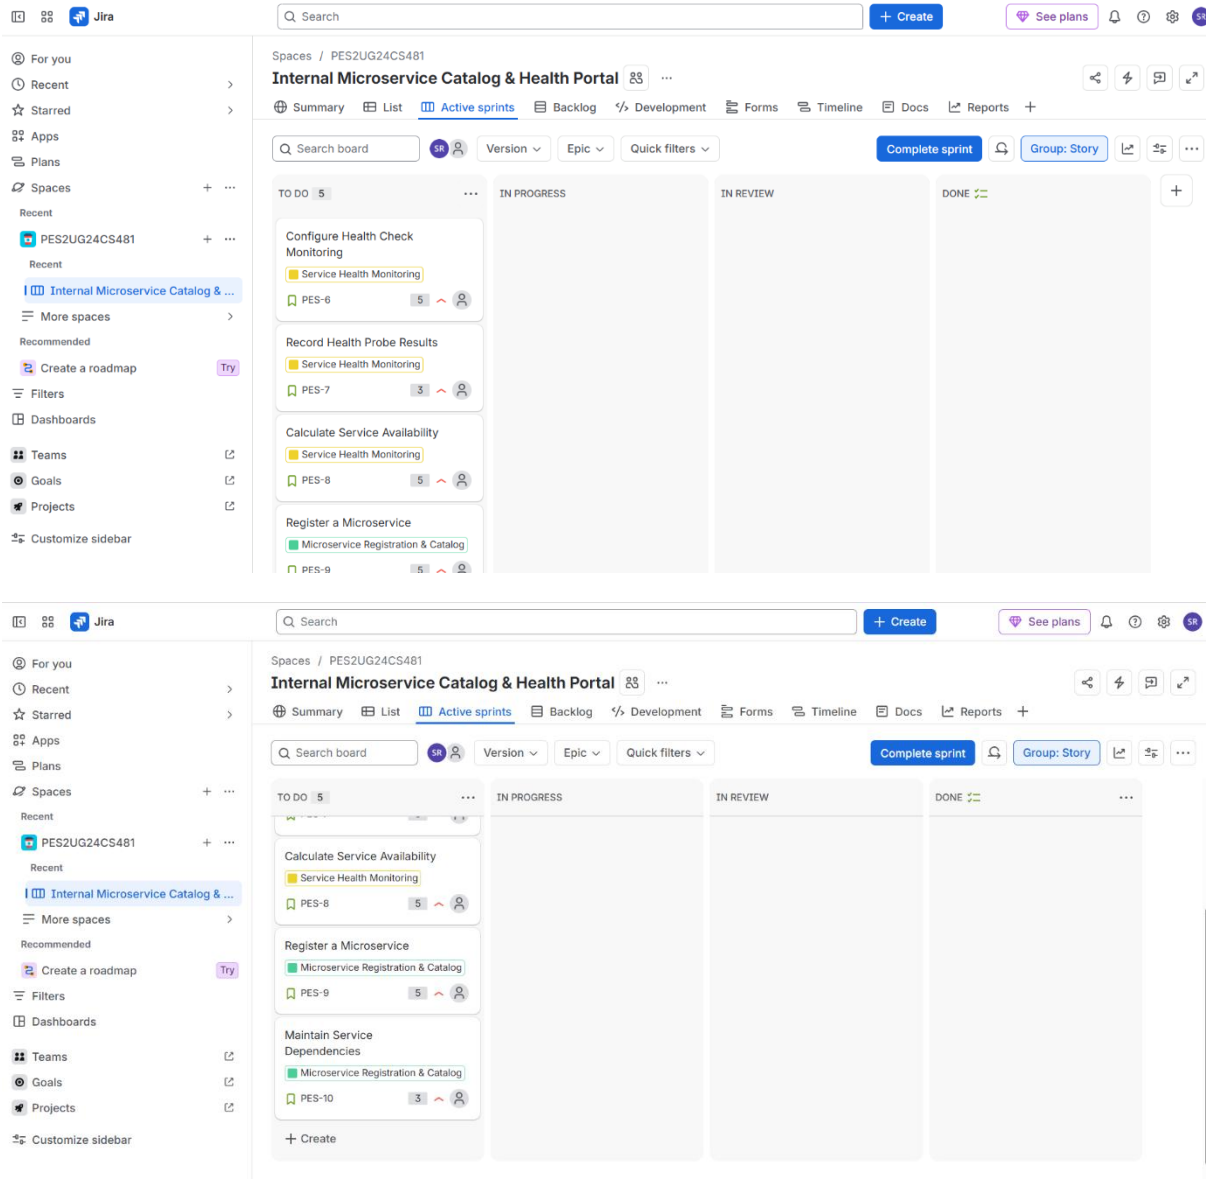

Gave story points to the user stories based on their effort.

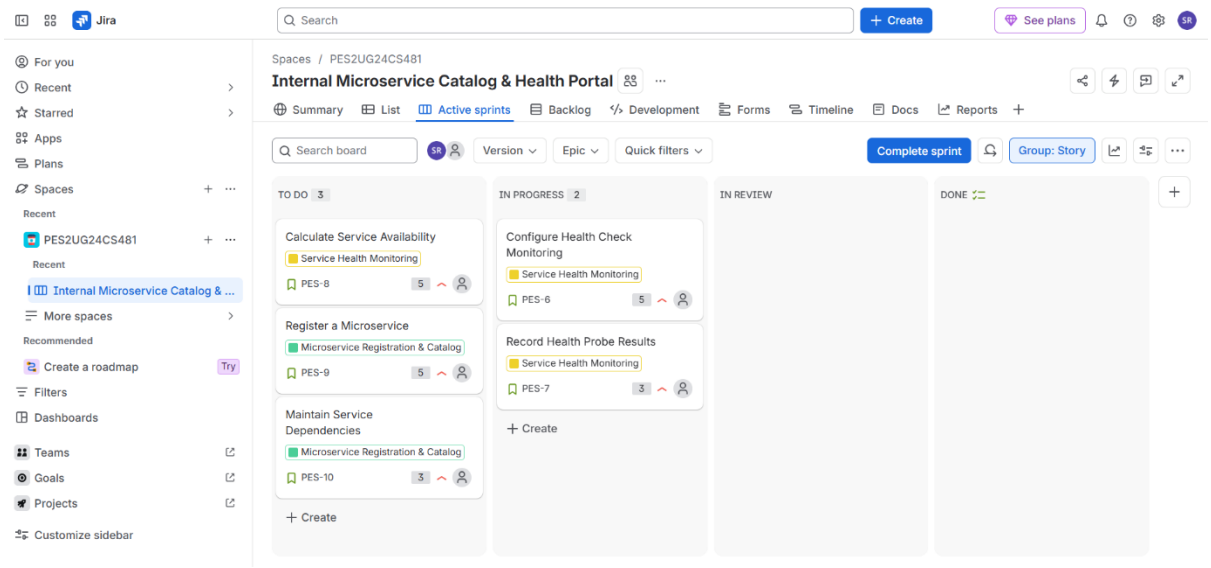

Created Sprint 1 and added the selected user stories to it.

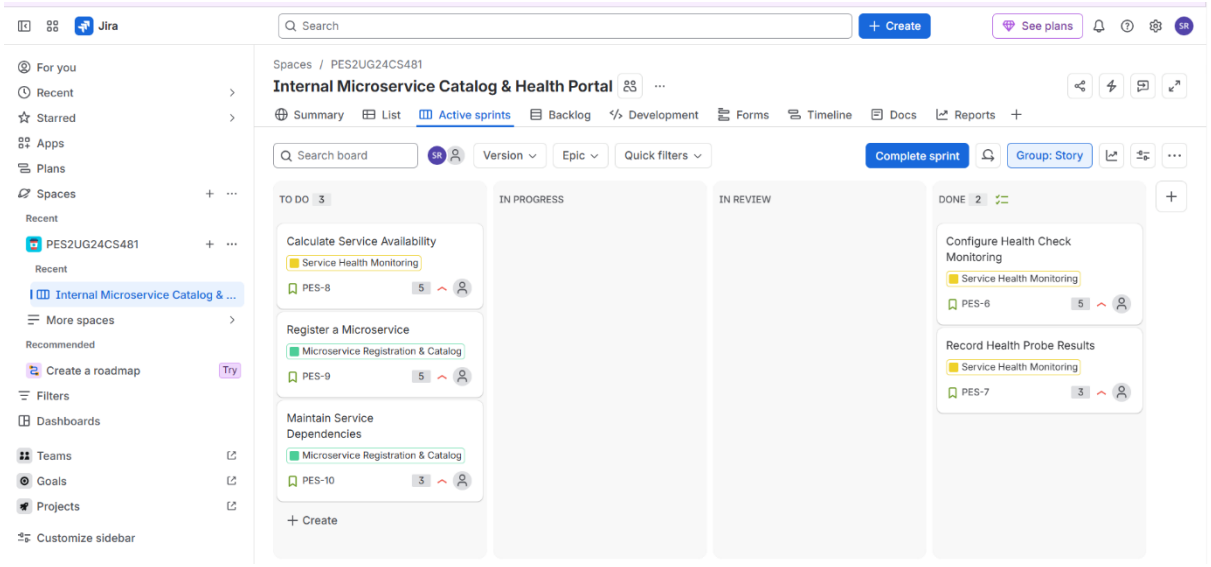

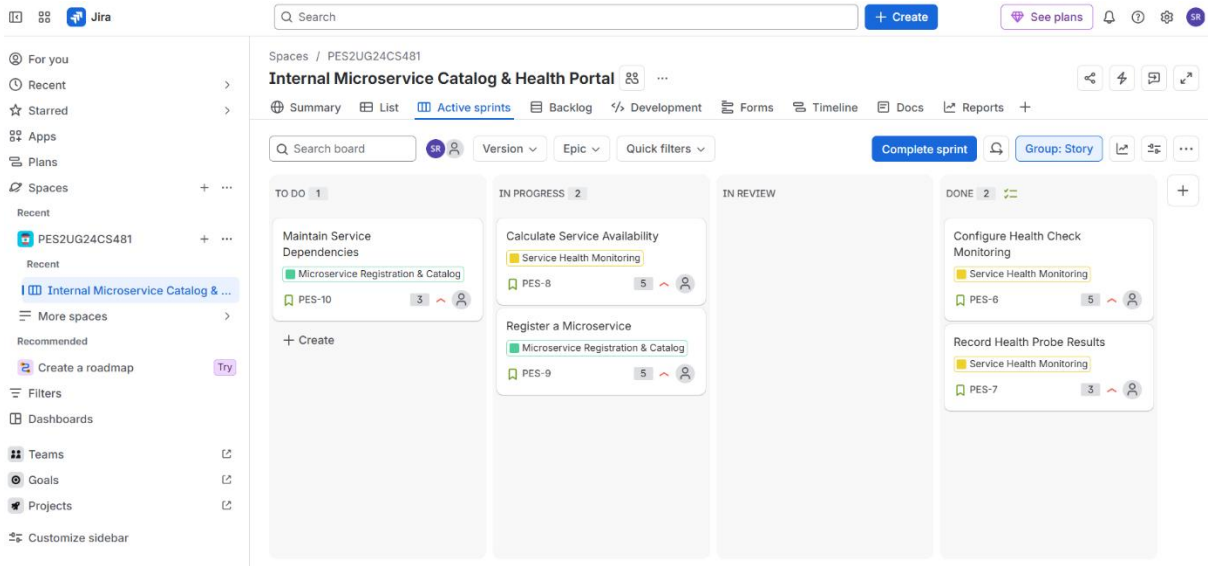

Started Sprint 1 with the selected stories in the To Do column.

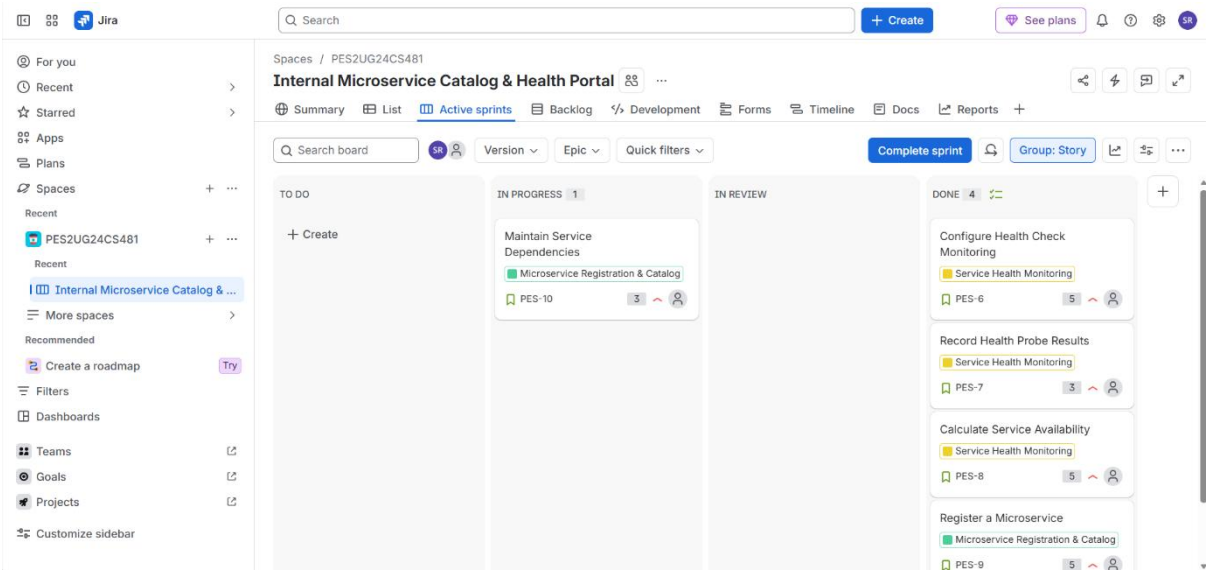

Moved the user stories from To Do to In Progress and Done to simulate sprint progress.

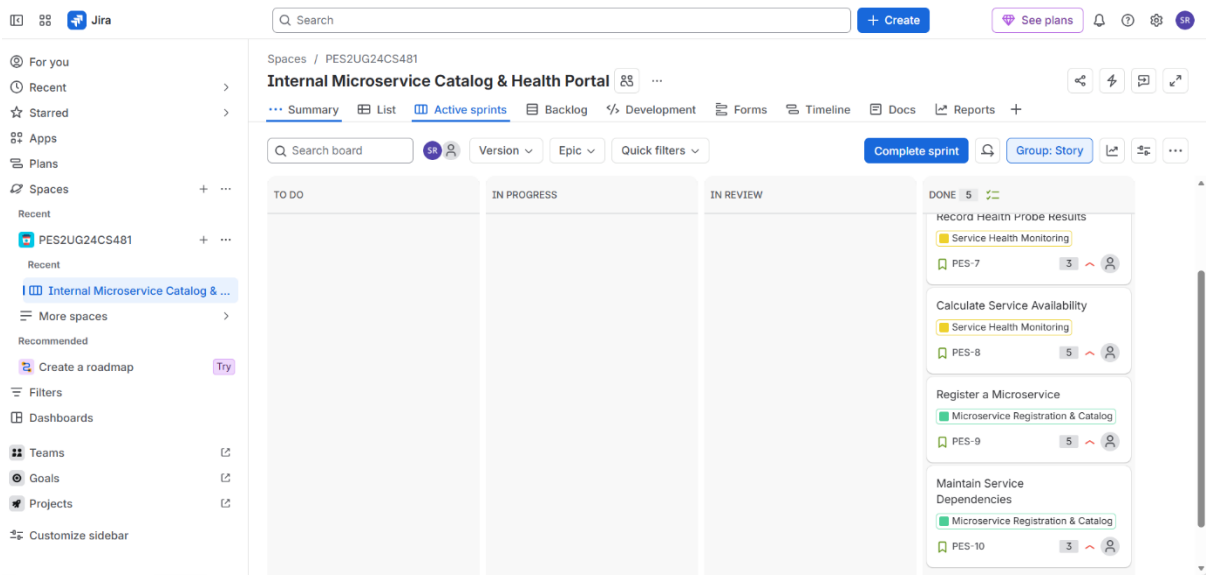

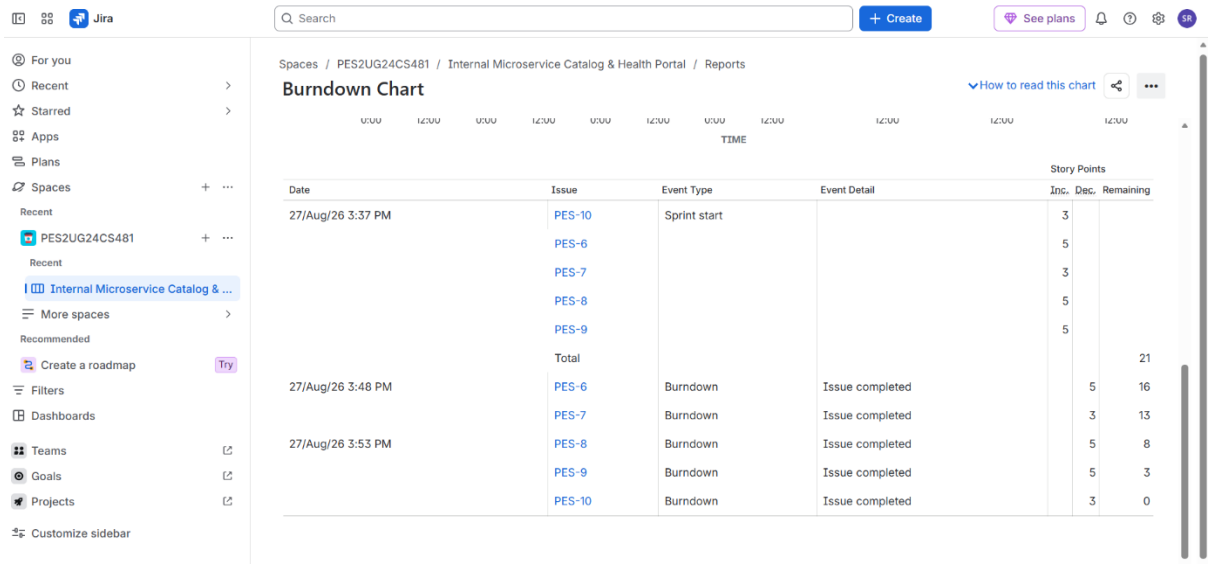

Completed the selected user stories for Sprint 1.

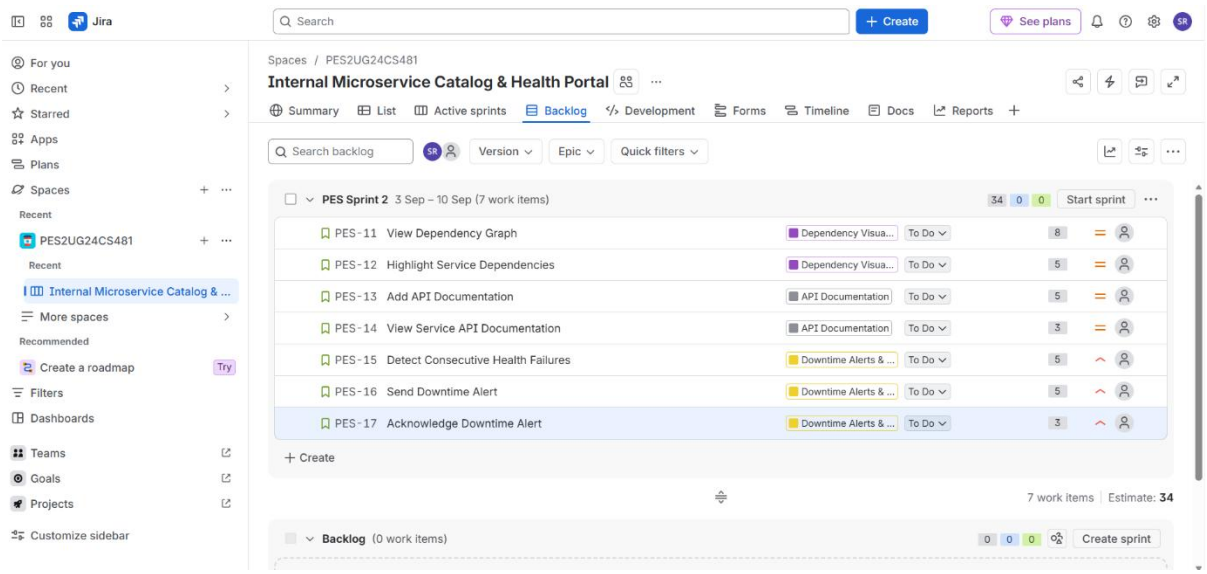

Viewed the burndown chart to check the progress of the sprint.

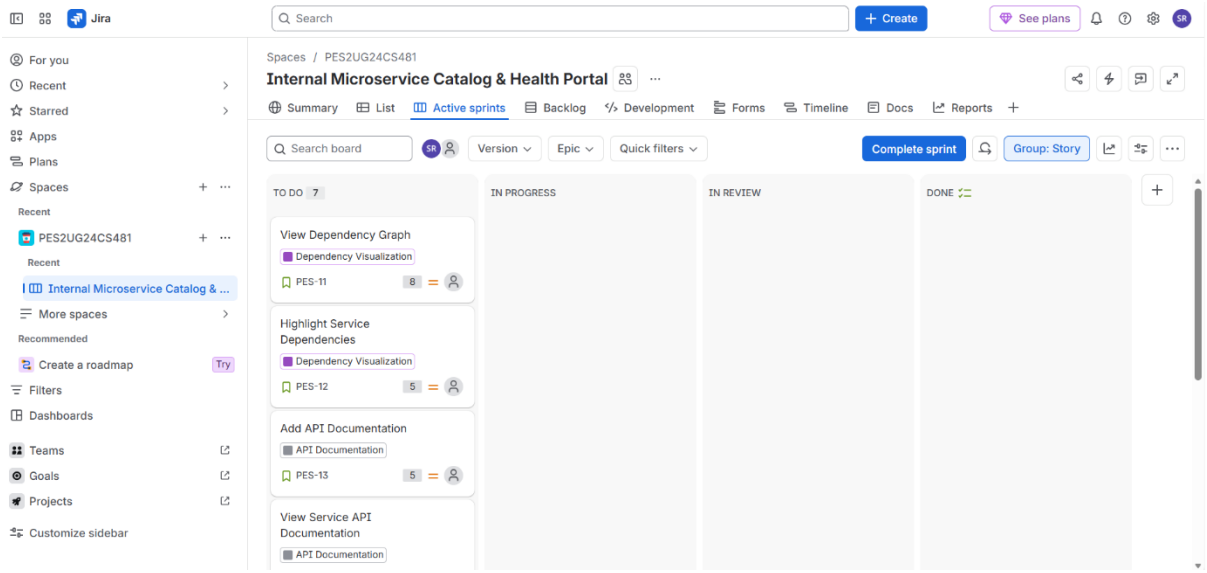

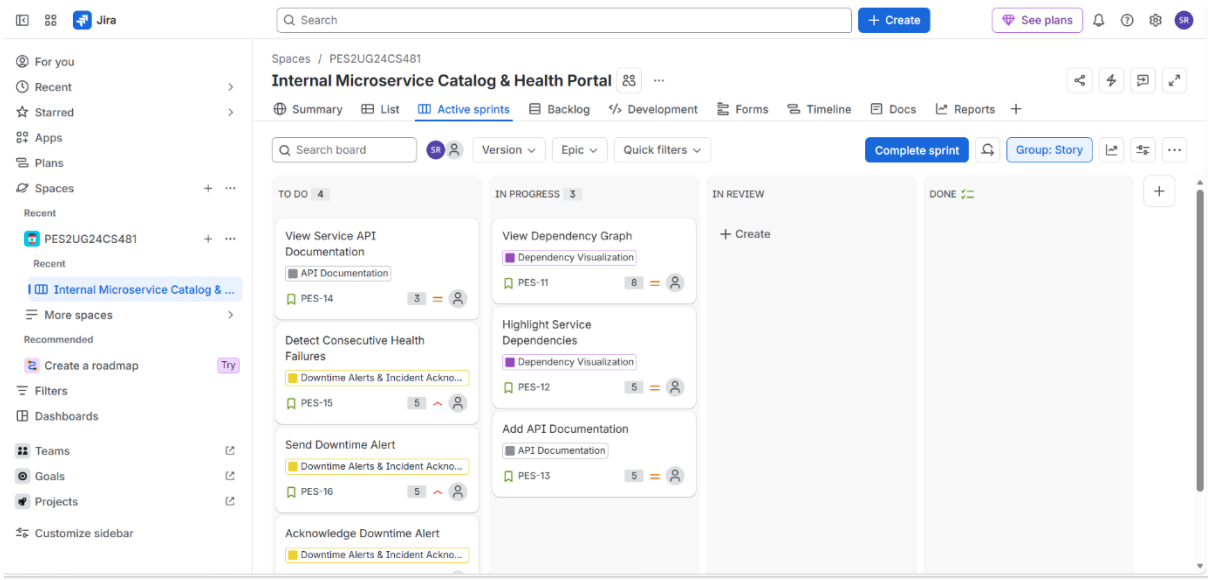

Created Sprint 2 with the remaining user stories from the backlog.

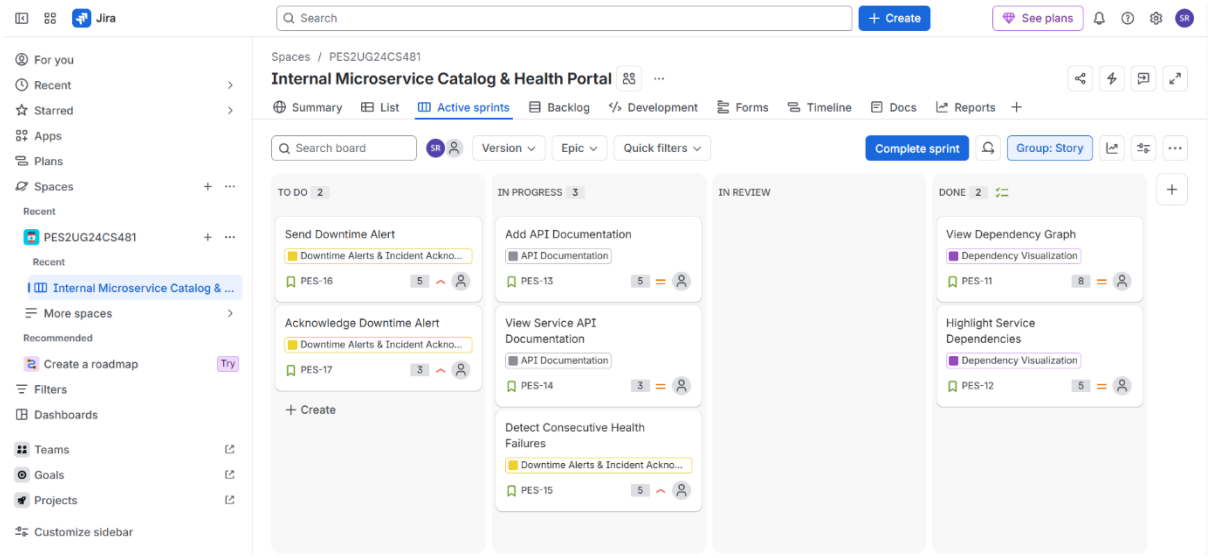

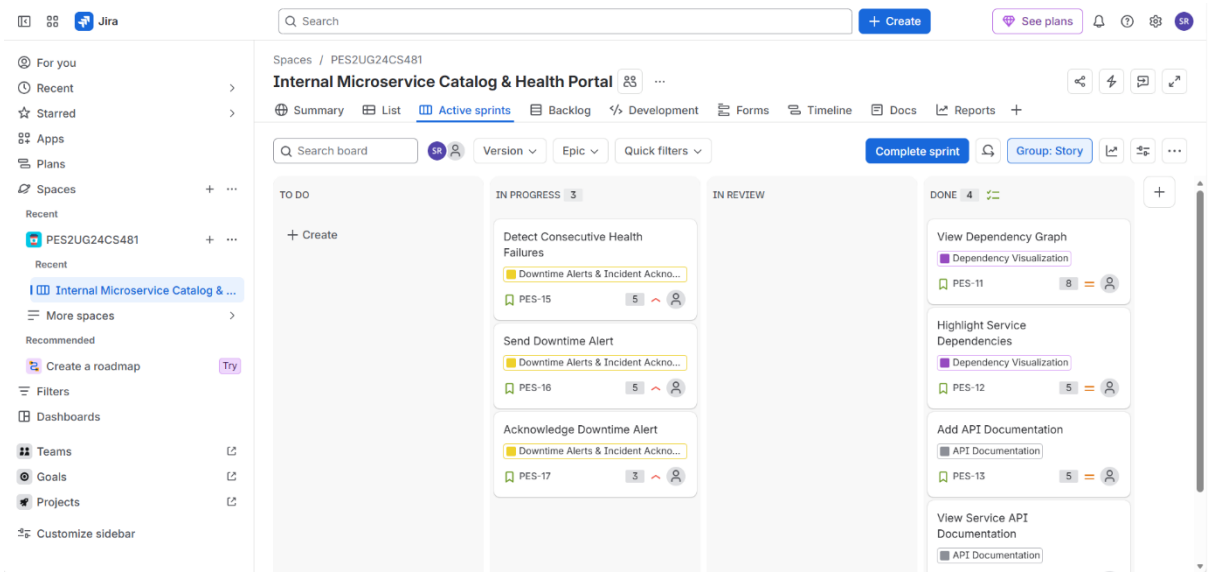

Started Sprint 2 with the selected stories in the To Do column.

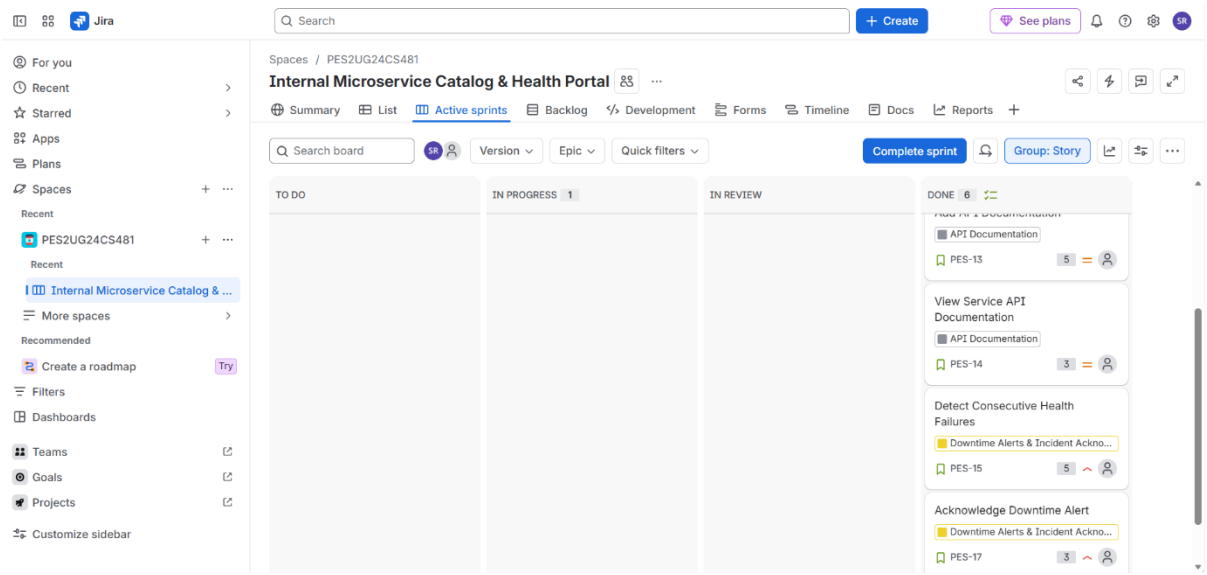

Moved the user stories from To Do to In Progress and Done to simulate sprint progress.

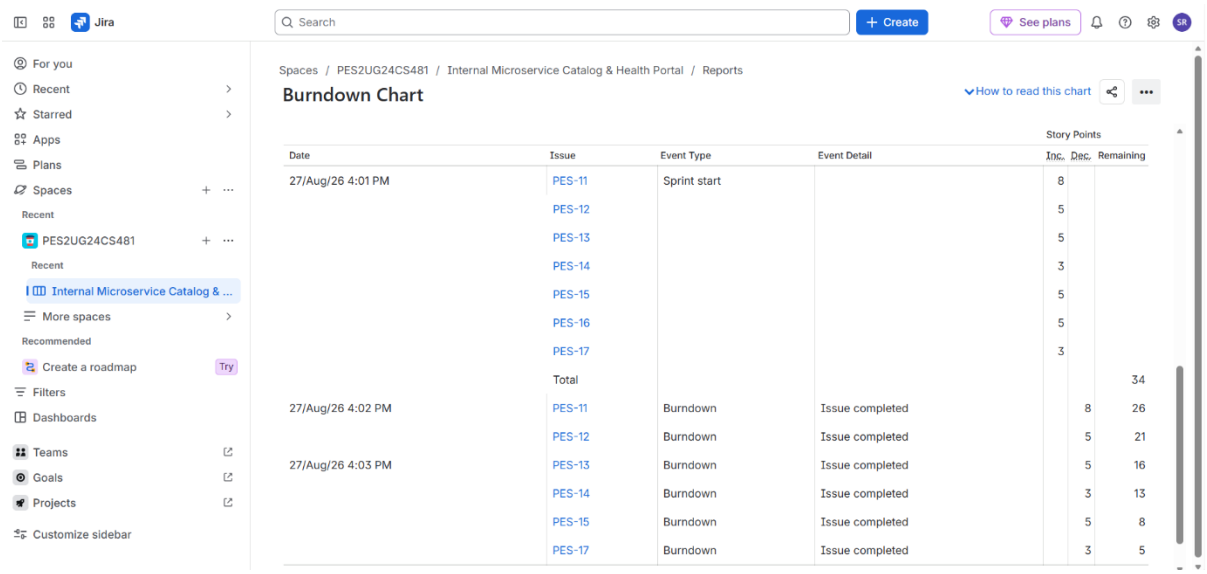

Completed the selected user stories for Sprint 2.

Viewed the burndown chart to check the progress of the sprint.

2. Reflection Questions:

1. Did your estimations reflect the actual effort?

Yes, the story points were mostly close to the actual effort. The simpler stories took less effort, while the more complex stories like the dependency graph required more work.

2. Was your backlog well-prioritized?

Yes, the backlog was prioritized based on the importance of each feature. Health monitoring, service registration, and downtime alerts were given higher priority because they are important for the main purpose of the portal.

3. How did your simulated sprint align with your plan?

The sprint mostly followed the original plan. I completed the selected high-priority stories in Sprint 1 and worked on the remaining stories in Sprint 2.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed how quickly the planned work was getting completed. It helped me understand the amount of work I could handle within a sprint and whether I was progressing as planned.
